Summary

I am an enthusiastic software engineer currently in my 7th semester at NCIT. Over time, my skill set has grown significantly, encompassing a diverse array of technologies. I specialize in web-based tools, particularly Node.js for backend development and React/NEXT.js for frontend tasks. I have hands-on experience collaborating remotely via GitHub and possess a knack for quickly adjusting to new teams and technology stacks.

Training and Experience

jun 28 2022 - jul 6 2022

Redmen: - Web development bootcamp

- Worked with html css and js and designed a portfolio.
- You can find the portfolio at <https://sandipnepali.com.np/>

Sept 14 2022 - dec 14 2022

Broadway Infosys :

Super App-Training Project

- Worked with React ,Styled component with Ant design.
- Worked with Node.js

Feb 23 2023 - march 26 2023

Everest Group walk - *Internship*

- Worked with React, Redux, React query.
- Worked with Node.js

sept 2023 - present

Food Hub - freelancing

- Worked with Next.js and Ant with Styled Component

March 2023 - present

Nepal College Of Information Technology - *Academic Project* **Yatra** -

- Worked with React ,Chakra UI for Frontend
- Worked with Node.js for backend

March 2023 - May 2023

Technopreneurship Program at NCIT -

- Learn about Technopreneur and SOAT analysis.
- Gain knowledge about MVP and the blue and red market.
- Business analysis

Education

April 2019 - present

Nepal College Of Information Technology – *Bachelors of Engineering in software*

April 2017 - 2019

JMC , Pokhara - *+2 Level*

Skills

Languages

HTML, CSS, JavaScript, TypeScript, Sass, Tailwind

Libraries

React, Redux Toolkit

UI Libraries - Bootstrap, Material UI, Chakra UI, Ant Design

Frameworks

Next.js, Node.js

CI/CD

Git

Others Skills

- I mostly used Vs code for projects and Thunder client / Postman for api Testing.
- I have high interest in the function programming approach. Since React promotes the functional approach I fell in love with React.
